# Project Planning Phase Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

| Date          | 28 October 2022                                |
|---------------|--|
| Team ID       | PNT2022TMID46374                               |
| Project Name  | Project – Personal Expense Tracker Application |
| Maximum Marks | 8 Marks  |

# **Product Backlog, Sprint Schedule, and Estimation (4 Marks)**

Use the below template to create product backlog and sprint schedule

| Sprints  | Functional<br>Requirement (Epic) | User Story<br>Number | User Story / Task  | Story<br>Points | Priority | Team members   |
|----------|----------------------------------|----------------------|--|-----------------|----------|--|
| Sprint-1 | User Panel                       | USN-1                | The user can register and login into the website, add expenses and see the progress of their expenses.   | 20              | High     | MONIKA T<br>SINDHUJA M.K<br>FALILA BANU H<br>MOUNIKA R |
| Sprint-2 | Admin panel                      | USN-2                | The role of the admin is to check about the progress of customers to provide any rewards if savings is increased.                                      | 20              | High     | MONIKA T<br>SINDHUJA M.K<br>FALILA BANU H<br>MOUNIKA R |
| Sprint-3 | Chat Bot                         | USN-3                | The user can directly talk to chatbot regarding the products. Get the suggestions based on information provided by the user.                           |                 | High     | MONIKA T<br>SINDHUJA M.K<br>FALILA BANU H<br>MOUNIKA R |
| Sprint-4 | Final delivery                   | USN-4                | Container of applications using docker<br>Kubernetes and deployment of<br>application. Create the documentation<br>and final submit of the application |                 | High     | MONIKA T<br>SINDHUJA M.K<br>FALILA BANU H<br>MOUNIKA R |

## Project Tracker, Velocity & Burndown Chart: (4 Marks)

| Sprint   | Total Story<br>Points | Duration | Sprint Start Date | Sprint End Date<br>(Planned) | Story Points<br>Completed (as on<br>Planned End<br>Date) | Sprint Release<br>Date (Actual) |
|----------|-----------------------|----------|-------------------|------------------------------|--|---------------------------------|
| Sprint-1 | 20                    | 6 Days   | 24 Oct 2022       | 29 Oct 2022                  | 20   | 29 Oct 2022                     |
| Sprint-2 | 20                    | 6 Days   | 31 Oct 2022       | 05 Nov 2022                  | 20   | 05 Nov 2022                     |
| Sprint-3 | 20                    | 6 Days   | 07 Nov 2022       | 12 Nov 2022                  | 20   | 12 Nov 2022                     |
| Sprint-4 | 20                    | 6 Days   | 14 Nov 2022       | 19 Nov 2022                  | 20   | 19 Nov 2022                     |

## **Velocity:**

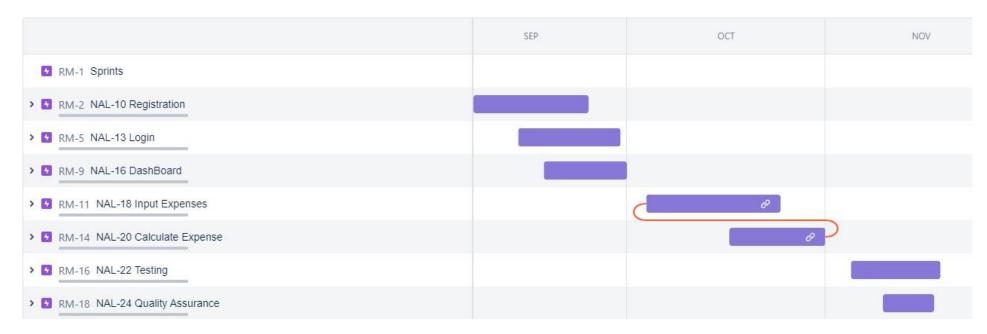

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{sprint\ duration}{velocity}$$

| Sprint   | Average Velocity |
|----------|------------------|
| Sprint-1 | 6.5              |
| Sprint-2 | 8                |
| Sprint-3 | 8.2              |
| Sprint-4 | 8                |

Total Average Velocity=7.5

# **Roadmap Using Jira:**

#### **Burndown Chart:**

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

#### **Burndown Chart**
